

New Organic Vitamin E

Since 2001, Vitae Caps, S.A. has been offering natural ingredients to food, food supplements and cosmetic market to boost their quality and value. Vitae Caps, S.A. has been pioneer implementing non GMO Certification (CERT ID) based on the strictest criteria of European Regulation EC 1829/2009. Apart from the necessary ISO 9001:2008 certificate, Vitae Caps has other important certifications such as cGMP, Halal and Kosher. Because of our quality and service, Vitae Caps is known around Europe. Today we are the main IP tocopherols supplier for EU market.

Following Vitae Caps' internal quality policy based on the compliance of current certifications requested by the market and customers, Vitae Caps have once again achieved to implement a new one: **Organic certification.**

Organic certification addresses a growing worldwide demand for organic food, while such certification was not necessary in the early days of the organic movement, when small farmers would sell their produce directly at farmers' markets, as organics have grown in popularity, more and more consumers demand organic products. For consumers, "certified organic" serves as a product assurance. This is the reason why Vitae Caps has become involved in obtaining Organic Certification for their natural ingredients in order to offer our customers tools to make them different. We have two certifications:

1. Food - Inputs in compliance with EC Regulation No. 834/2007 and 889/2008, and NOP (ECOCERT)

We have ECOCERT certification for Vitapherole® T and E products for the use in organic foods processes in organic farming, since they are processed and marketed in a way that is appropriate for organic production under the rules EC Regulation No.834/2007, 889/2008 (annexes I and II) and NOP (sub-part G).

2. Cosmetic - ECOCERT Greenlife

Furthermore, we are happy about ECOCERT conformity approval for Vitapherole® T, Vitapherole® E and Vitapherole® E acetate for the use in natural and organic cosmetics under private Reference Standard for natural and organic cosmetic (within the framework of the Decree n°95-354 of 03/30/95 relating to the certification of industrial products and Services).

Please, feel free to contact Vitae Caps to request the specifications of these products and samples.
